

FotoBox

A Hand-Crafted Wi-Fi Digital Picture Frame with Flickr Integration

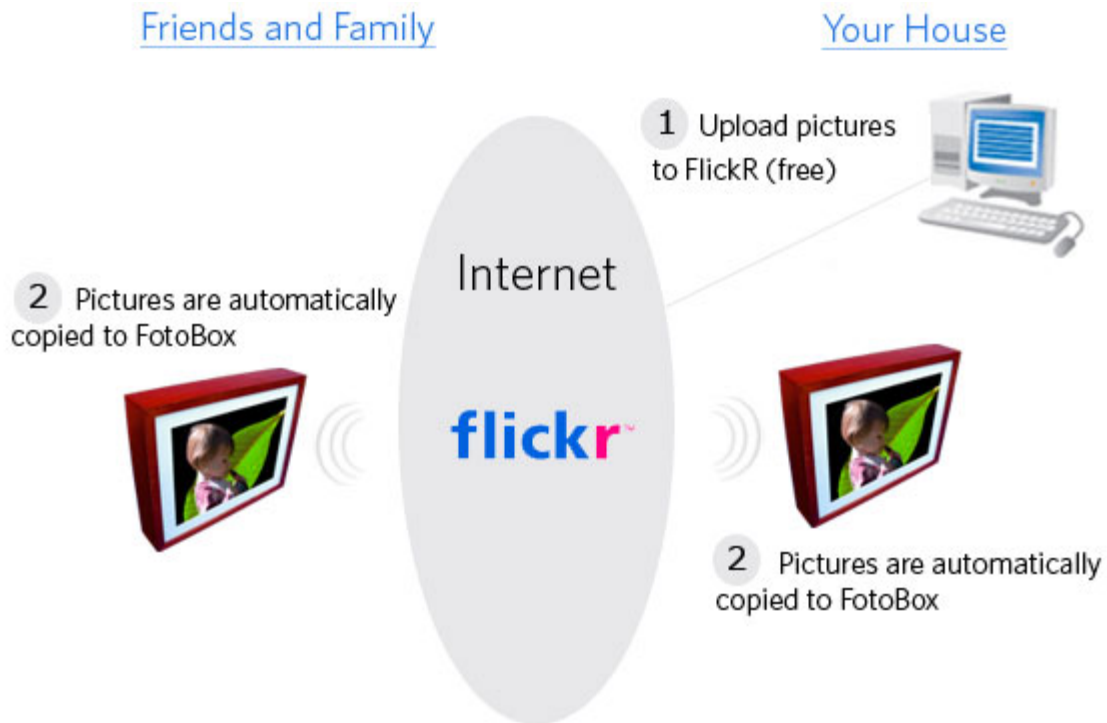

Features:

- Flickr (www.flickr.com) enabled, you can upload pictures to your FlickrR account which will then automatically download to FotoBox *
- Wood frame (walnut or black)
- Pictures can be added and deleted over your Wi-Fi home network *
- Pictures can be added from the included SD memory card reader.
- FotoBox can be remote controlled from a web browser *
- Sound enabled, customize the start-up and shutdown sounds
- Picture slideshow interval is configurable or just one picture can be displayed continuously
- Easily disassembled for service and upgrades

* W-Fi home network required

Combined with the free [Flickr](#) service, **FotoBox** is a great way to distribute pictures to friends and family. Just upload pictures to Flickr and they will then automatically be copied to **FotoBox**.

Specifications:
